PING ERROR TEST

1. Destination host unreachable?

It means there is no route in Pc route table for destination IP.

Ex: 10.0.0.10 to 40.0.0.10 Ping means this error show.

2. Request time out?

It means the Pc has send the data but the response is not came. The problem is like If we sending Pc to router. the Pc has send but there is no route in routing table for destination IP.

3. Reply from some IP destination host unreachable?

It means the network route cannot find in the device. like Pc has send to router in router there is not route so router to Pc replay is came.

4. TTL expired?

TTL (Time to live)

- It occurs when a data reaches 0 before reaching its destination.
- The problem is looping
- we have to check gatway

Operating System:

windos	128	Default TTL values.
Linux	64	
cisco	255
