

Physical connection

1. Types of Medium?

There are two types of medium

* wireless

* wired

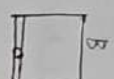

* wireless

It works on Radio frequency (RF)

Eg:

Skirt

Skirt → For transferring data

* wired:

• Copper cable → Electrical signal

• Fiber cable → light signal

2. Write down switch 8-Pins?

1 +T

2 -T

3 +R

4 +V

5 -V

6 -R

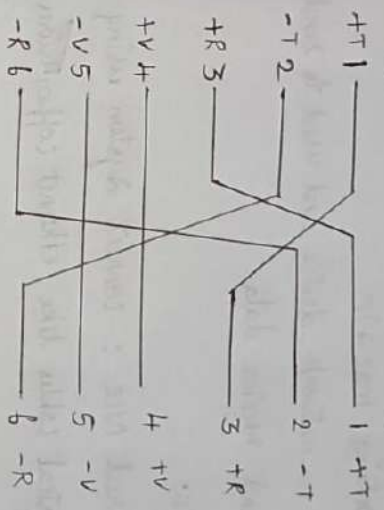

7 *

8 *

POE (Power over Ethernet)

For future purpose

3. Connect UTP cable between two devices

* 7 _____ 7 *

* 8 _____ 8 *

4. Explain Auto MDIX?

• It automatically converts

5. Explain PoE Injector?

POE (Power over Ethernet) injector add electrical power to ethernet so that we can power the devices like cameras.

6. Explain PoE Switch?

• It is a network device
• It is used to provide power supply for end devices through cable

Explain types of NIC & function?

- NIC (Network Interface Card)
- It contains mac + ip
- It is a network device and used to send data and receive data

Types of NIC:

- wired NIC : connect system using physical cables like ethernet copper wires
- wireless NIC : connect system through radio frequency signal using wifi.

Functions:

It is used to convert binary signals to electrical & electrical signals to binary.
