

LAN COMMUNICATION

1. Explain uses of Ping command in network?

- * Ping command is used to check the network connectivity.

- * It sends the request packet and come response.

- * Eg: Ping 50.0.0.10

2. Explain netbios protocol?

- * Netbios (Network basic input/output system)

- * It is used to communicate over a LAN in different computers.

- * It gives each computer a Netbios name.

3. Explain SMB Protocol?

- * SMB (Server Message Block)

- * It is used for sharing files and other materials between computers on a network by assigning IP.

4. Explain Ping process from 50.0.0.10 to 50.0.0.20?

- * Ping sends 4 packets and receive 4 packets total 8 packets on windows it defers in OS.

- * Both IP should be on same network.

like ^{Pc1} 50.0.0.10/8 ^{Pc2} 50.0.0.20/8
